

# Tech Deck

Built for the third sector

By the third sector.

Reduce costs. Strengthen systems. Release funds into your mission.

100% of our profits fund mental health support

# You're Probably Paying for More Tech Than You Need.

**Overcomplicated systems. Long contracts. Poor service.  
Rising costs.**

**Sound familiar?**

**For many charities, technology has become an unavoidable  
expense - but not always a valuable one.**

**Money that could be funding frontline services is tied up in  
systems that are overpriced, underused, or unnecessarily  
complex.**

## We Get It - Because We're One of You

**We're a not for profit - and we deliver tech differently.**

**We've experienced the same pressures: limited budgets,  
increasing expectations, and the need to do more with less.**

**So we changed the model.**

# Tech, Done Differently

## Technology That Works, Without The Fuss.

Tech Deck by MH360 is built around a simple principle: *start with what you don't need.*

We strip away unnecessary cost, complexity, and contracts - leaving you with technology that works, and a budget that goes further.

## What That Means for You

- Immediate costs savings
- Simpler, more effective systems
- No unnecessary tools or licences
- Technology aligned to how you actually operate

## And When You Need Support

You won't be routed through a call centre.

You'll speak directly to people who understand your setup, your priorities, and your pressures.

Often resolving issues before they become problems.

The background features a stack of playing cards with various technology-related icons. From left to right, the cards are: Queen of Diamonds (Q♦) with a smartphone and gear icon; King of Clubs (K♣) with a smartphone and gear icon; King of Hearts (K♥) with a telephone and speech bubble icon; and Ace of Spades (A♠) with a laptop and padlock icon. The cards are slightly overlapping and have a soft, faded appearance.

# Why This Matters

## Technology That Protects Your Mission

You're expected to deliver more, with less - while meeting increasing expectations around data protection, cyber security, compliance and accessibility.

At the same time, prices are rising.

### Tech Deck Helps You:

- Reduce unnecessary spend and free up budget immediately
- Meet funder expectations around security and compliance
- Keep systems reliable, secure, and easy to manage
- Protect sensitive data, donor information, and operations

### The Real Impact

Every pound saved on technology is a pound that can be redirected into frontline services.

# About Us.

## Experience that makes the difference

Our teams have worked across organisations of all sizes - from household brands to local enterprises - so we know what works, what doesn't, and how to make technology deliver real value for you.

We've seen the trends, the fads, and the overcomplicated solutions - and we've learned how to strip them back to what really matters.

## We're Mental Health 360

With over 23 years combined experience, we've delivered mental health support across Staffordshire, Cheshire and beyond - But demand continues to grow - and traditional funding alone isn't enough.

That's why we've evolved. Diversifying income into sustainable generation, we've developed high-quality traded services that directly fund and expand our work.

Tech Deck is one part of that traded income, alongside our subscription based growth solutions - designed to help organisations strengthen, scale, and sustain their impact.

*Meet the MH360 family*

*With Tech Deck, your spend doesn't just pay for technology - it keeps people supported and communities thriving.*

We offer five core services - but we don't assume you need them all in one go.
